ABOUT ME

A dedicated and passionate front-end developer with 3 years of experience with a strong foundation in web development technologies.

A team player who thrives in collaborative environments, and am always eager to contribute my skills to build innovative and functional web applications.

TECHNICAL SKILLS

Programming Languages:
- JavaScript, TypeScript, Golang (pre-intermediate)

Frameworks/Platforms:
- ReactJS (Library), NodeJS, NextJS
- Webpack/Babel, Redux-thunk, Redux-toolkit, React Query, Zustand
- TailwindCSS, ShadcnUI, Gsap
- ExpressJS, GraphQL, Restful API
- Datadog, Auth0, Dockers

Database Management Systems:
- PostgreSQL (relational), MongoDB (NoSQL document)

English: TOEIC 895 (L & R), 7 (S), 6 (W)

Others:
- Good understanding of SOLID principles, and design patterns.

PROFESSIONAL EXPERIENCE

S3 Corporation | Ho Chi Minh

🌐 s3corp.com.vn   2021 – 2024

Title: Front-end Developer

Project: Casper-UI

Description: Custom UI library support across all projects, increases developer productivity and code reuse.

Team members: 7 Front-ends

Technologies & Platforms:
- Legacy Front-end project: ReactJS + Typescript + Aurora Base UI
- Build tools: Rollup, Lerna
- Infrastructure: Jenkins

Responsibilities:
- Evaluate and implement new UI components based on the designs and requirements.

- Work with the design team to ensure possibility, then write documents as well as base examples for the components.
- Collaborate with the Front-end team to define and optimize code convention (includes linter, unit test, and build script).

Project: VMI (Vendor Management Inventory System)
Description: A solution allows monitoring of real-time inventory status for more than 10 Vendor's Warehouse, viewing the available stock, tracking contract status, and letter of instruction, and managing more than 1 million information of cables, batches, issuance, and more.
Team members: 9 (2 DevOps Engineers, 3 Back-end, 2 Front-end, 2 QA)
Technologies & Platforms:
- Legacy Front-end project: ReactJS + Typescript + Casper-UI, Auth0
- State Management: React Query + QraphQL code-generator
- Back-end: Golang, PostgreSQL, GraphQL, SQLBoilers, Dockers, Azure Storage
- Infrastructure: Jenkins, Graylog, Datadog, Mulesoft, RBAC, Kafka
Responsibilities:
- Read up and deeply understand requirements and business logic according to the SAP system.
- Clarify flow, work closely with team and designer to evaluate the UI, making design decisions and delivery.
- Collaborate with the Front-end team to define and optimize code convention (includes linter, unit test, and build script).
- Developed UI, integrated with Back-end API, services, and Auth0. Wrote clean and structured code following a unified standard (custom hooks, separate concern).

EDUCATION BACKGROUND

Industrial University of Ho Chi Minh City, Viet Nam
- **Date:** Aug 2018 - Mar 2022
- **Specialize:** Studying Information Technology - Information System
- **Degree grade:** Good - Associate Degree
- **GPA:** 3/4

SOFT SKILL

- Decision making
- Communication
- Problem solving

PERSONAL WORKS

Over the past 3 years since I was ready for my last semester, I have drafted a few projects that helped me land my first job as a front-end developer. Some of them have been modified to use new technologies based on the experience that I have gained over the years.

Covid - 19 Landing page (Since 2021)
🌐 covid-19
> phuc-create/covid-19

In 2021, I embarked on a project inspired by a post from a community member, and it motivated me to create something that could help protect us from the spread of the virus. My project represents my vision for safeguarding ourselves, and I am excited to share it with others looking for ways to stay safe and healthy.

- Stack: HTML & CSS & Bootstrap & Gsap

Banner anime shop (Since 2021)
🌐 banner-shop
> phuc-create/shop-app

Browser collection of anime art, an e-commerce shopping website that I created in 2021 because of big inspiration from anime movies, recently I had some upgrades to use the latest technologies and enhance some functionalities.

Test account: email: p@p.com, pwd: ssssssss

- Stack: ReactJS, Typescript, NodeJS, ExpressJS, MongoDB, Redux Toolkit

Instagram Clone site (Since 2022)
🌐 ins-clone
> phuc-create/ins-clone

Instagram landing page and user profile clone. Because it looks like an official site, so there is a warning mention about the dangerous site when you are accessing the site, but don't worry, feel free to skip it.

- Stack: ReactJS

Find Game (Since 2022)
🌐 find
> phuc-create/find

It is a fun game, with the ability to improve critical thinking based on hints, this game was created based on a quiz on social networks, and I remade it to consolidate my knowledge.

- Stack: ReactJS, Typescript

Memory Game (Since 2024)
🌐 m-game
> phuc-create/memory-game

In early 2024, this game was created, and it was a gift for my nephew and niece, to be able to increase memory and improve intuition, as well as sharpness.

- Stack: NextJS, Typescript, TailwindCSS, Zustand
